

2.0 UTILITIES AND COMMUNITY FACILITIES

2.1 CHAPTER SUMMARY

The purpose of this chapter is to inventory, map, and forecast utilities and community facilities. Often referred to as public works, utilities and community facilities are the physical infrastructure of a community. They facilitate the community's ability to function and grow.

Community facilities can include garages for road maintenance, libraries, municipal offices, town halls, schools, police stations, fire stations, parks, etc. They are supported by utilities such as water services, sewer system, storm water drainage, electricity, etc. At times, a community's facilities and utilities require expansion, rehabilitation, or the creation of new facilities. As near as possible, this chapter tries to forecast the future utility and community facility needs of the Town of Jamestown. These needs vary according to growth and level of service deemed publicly acceptable.

Wisconsin State Statute 66.1001(2)(d)

(d) Utilities and Community Facilities

A compilation of objectives, policies, goals, maps and programs to guide the future development of utilities and community facilities in the local governmental unit such as sanitary sewer service, storm water management, water supply, solid waste disposal, on-site wastewater treatment technologies, recycling facilities, parks, telecommunications facilities, power-generating plants and transmission lines, cemeteries, health care facilities, childcare facilities and other public facilities, such as police, fire and rescue facilities, libraries, schools and other governmental facilities. The element shall describe the location, use and capacity of existing public utilities and community facilities that serve the local governmental unit, shall include an approximate timetable that forecasts the need in the local governmental unit to expand or rehabilitate existing utilities and facilities or to create new utilities and facilities and shall assess future needs for government services in the local governmental unit that are related to such utilities and facilities.

2.2 GOALS

Two goals from the fourteen Smart Growth Planning Goals in Wisconsin’s comprehensive planning law, relate to utilities and community facilities. They are

1. Encourage land uses, densities and regulations that promote efficient development patterns and relatively low municipal, state governmental and utility costs.
2. Provide adequate infrastructure and public services and an adequate supply of developable land to meet existing and future market demand for residential, commercial and industrial uses.

2.3 OBJECTIVES AND POLICY AND PROGRAM RECOMMENDATIONS

The following utility and community facility resource objective and policy recommendation supports the above goals. It will guide utility and facility resource decisions in the Town of Jamestown over the next 20 years.

NOT IN ORDER OF PRIORITY

1. **Discourage utility extensions into areas environmentally unsuitable for urban development due to soils, flooding, topography, etc.**
2. **Encourage well testing among private, individual wells as a means of protecting drinking water supplies for these users.**
3. **Consider adopting a standard requiring that all costs associated with water and sewage extensions into developments, be paid by the homeowner or developer.**
4. **Consider developing and regularly updating a Capital Improvements Plan (CIP).**

2.4 PUBLIC UTILITIES AND COMMUNITY FACILITIES

2.4.1 MUNICIPAL SANITARY SEWER SERVICE

Municipalities usually have a wastewater treatment facility (WWTF) and a sanitary sewer system to treat wastewater. However, most towns do not have a municipal WWTF and rely mainly on private septic systems. It is possible that a town may have a sanitary district. In that case, there would be sanitary sewer service for town residents. At present, the Town of Jamestown contains three sanitary districts:

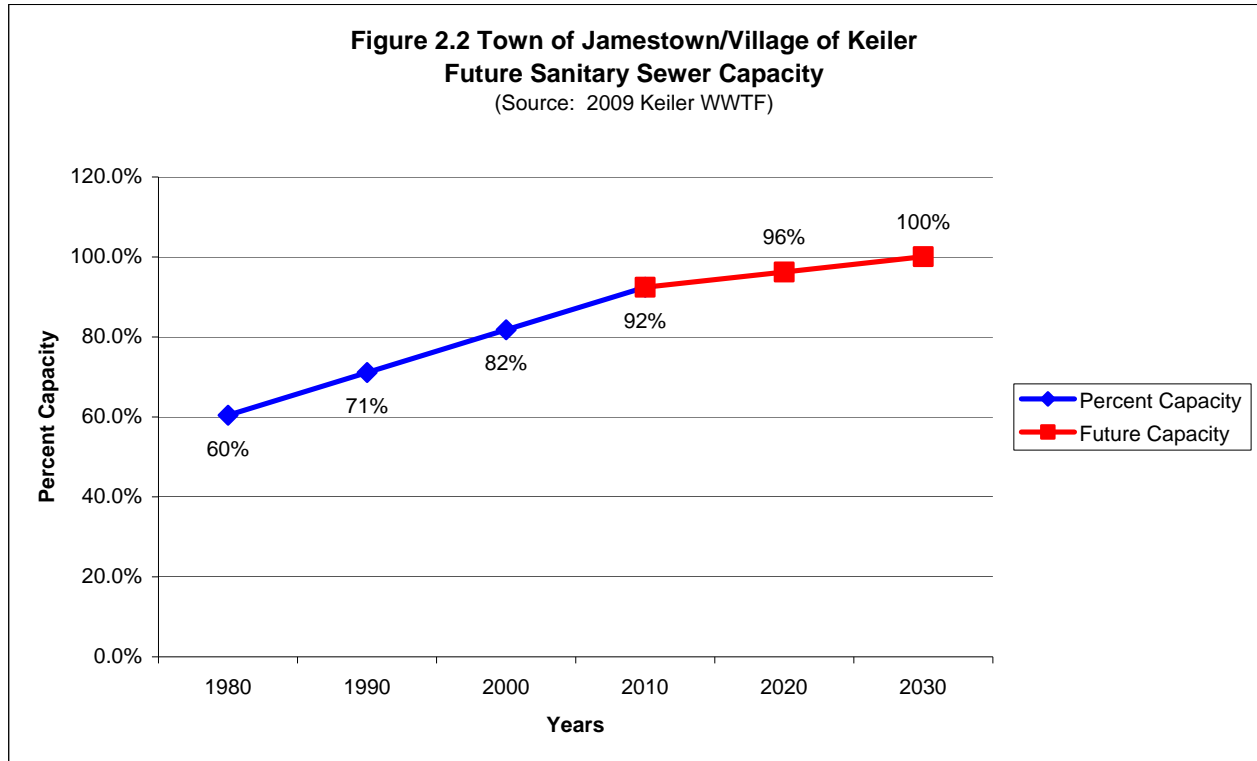

Kieler Sanitary District
 Faber Runds, President
 (608) 568-7556

Maryville Heights Sanitary District
 Charles Lyman, President
 (608) 748-4783

Louisburg Sanitary District
 Floyd Timmerman, Comm.
 (608) 748-4441

Municipalities usually have a wastewater treatment facility and a sanitary sewer system to treat wastewater. At present, the Town of Jamestown’s Wastewater Treatment Plant (WWTP) serves an estimated 200 households and 4 businesses. It is an activated area aeration ditch system, built in the mid 1984 and located 3854 Kilian Lane in Paris Township. In 1999 new sludge holding tanks were installed and in 2001 a new lift station put in.

Figure 2.1, displaying the sanitary district’s projected sewer capacity, currently shows operations to be at 82% and 93 %. Currently, its average flow is .055MGD (million/gallons/day) with a design average flow of .091 MGD. Please keep in mind that this projection is set on the population of the sanitary district, which anticipates that an additional 30 households will be added every 10 years.

2.4.2 PRIVATE WASTEWATER TREATMENT

For most towns, all private wastewater treatment is through onsite wastewater treatment systems (POWTS), commonly referred to as septic systems. Septic systems treat domestic wastewater, including domestic sanitary, bath, laundry, dishwashing, garbage disposal, etc. The system receiving wastewater either retains it in a holding tank, or treats and discharges the water into the soil. (Any system with a final discharge upon the ground surface or discharging directly into surface waters of the state is subject to DNR regulation.)

Septic systems are most commonly used in rural or large lot areas where municipal sanitary sewer is not available. They are regulated under WI COMM-83 and permits are issued by the Wisconsin Department of Commerce and the WI-DNR. Refer to the Grant County Sanitation Department, the WI DOC, or the WI DNR for more information on sanitary sewer regulations.

The Town of Jamestown has 540 households and 36 businesses with private septic systems. There may also be three or four homes within the sanitary district that have private septic systems. Jamestown does not have any private wastewater treatment plants (such as a large dairy, a cheese factory, or hospital).

2.4.3 STORMWATER MANAGEMENT

The management of stormwater involves providing the controlled release of runoff to receiving systems, typically through detention and/or retention structures. A stormwater system can be very simple – a series of natural ditches or a complex system of culverts, pipes, and drains. Either way, the purpose of the system is to store and channel runoff to specific areas, in order to diminish flooding impacts and possible non-point source pollution.

As of August 2004, any construction site disturbing more than one acre of land must get state permits and keep soil on their land during and after construction (NR 151, 216). The threshold was lowered from five acres to one acre in order to comply with U.S. Environmental Protection Agency Phase 2 Storm Water Regulations. The purpose of the regulation is to lower and control the amount of sedimentation that reaches Wisconsin rivers and lakes. Refer to the WI DNR for more information.

The Town of Jamestown uses detention ponds to help control stormwater.

2.4.4 WATER SUPPLY

Wells are safe, dependable sources of water if sited wisely and built correctly. Wisconsin has had well regulations since 1936, and today is recognized as a national leader in well protection. NR 812, formerly NR 112 and referred to as the Well Code, outlines how wells must be constructed and pumps installed. It is administered by the WI DNR. The Well Code is based on the premise that if a well is properly located, constructed, installed, and maintained, it should continuously provide safe water without a need for treatment. Refer to the WI DNR, the Grant County Department of Sanitation for more information on water quality and well regulations.

Data for Tables 2.1 through 2.5 for the Town of Jamestown is from the 2007 Annual Utility Report from the Wisconsin Public Service Commission. Current rate information can be obtained by contacting the jurisdiction directly.

Table 2.1 Sources of Water Supply - Groundwater

ID#	Location	Depth (Feet)	Well Diameter (inches)	Potential Yield Per Day (gallons)	Currently in Service?
1	Well	600	8	172,800	Yes

Table 2.2 Water Supply – Pumping and Water Supply Equipment

ID#	Purpose	Destination	Year Installed	Type of Pump	Actual Capacity (gpm)
1	Primary	Distribution System	1988	Other	120

Table 2.3 Water Supply – Storage and Treatment

ID#	Type	Year Built	Primary Material	Total Capacity	Disinfection & Application	Corrosion Control Used?	Fluoride Used?
2	Standpipe	1988	Steel	1,500	Liquid	No	No

Table 2.4 Water Supply – Water Mains

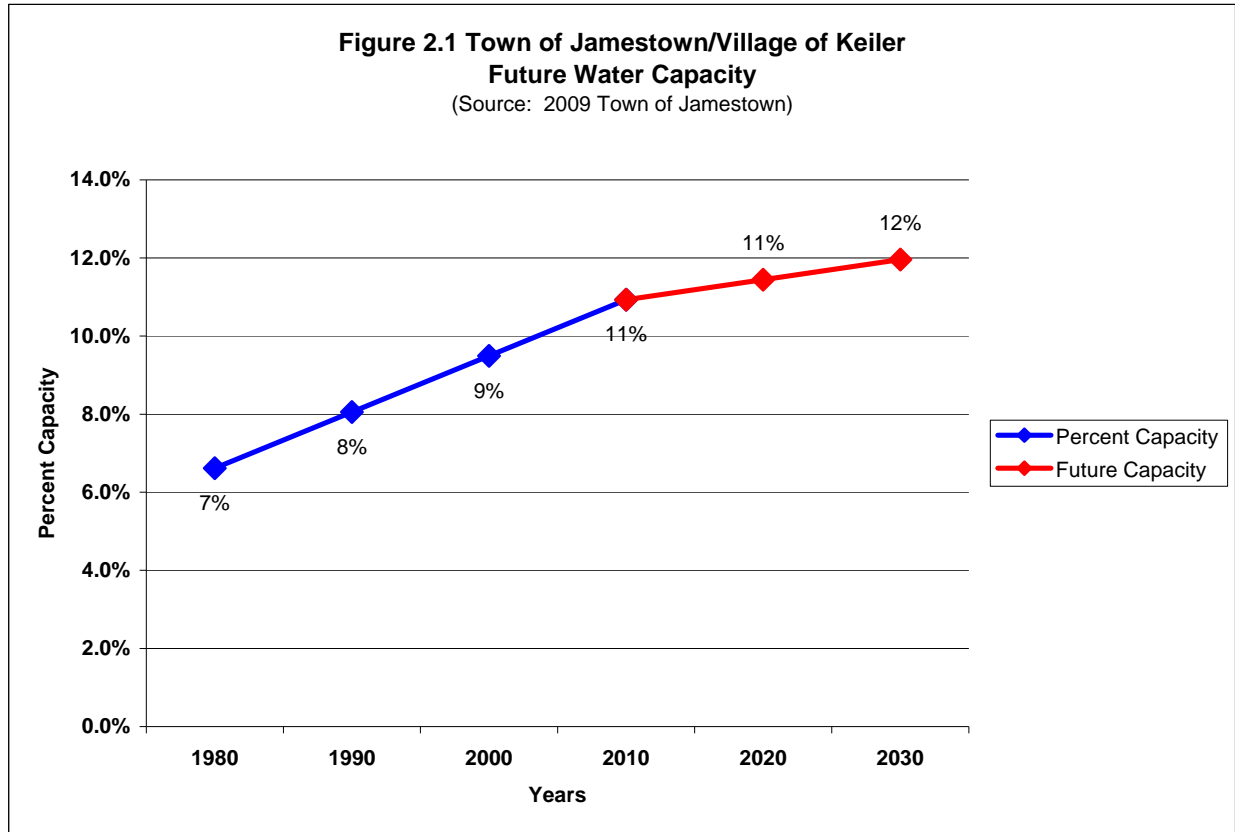

Pipe Material	Function	Diameter (inches)	Number of Feet (End of Year)
Metal	Distribution	6	2,000
Plastic	Distribution	6	1,447

Table 2.5 Fire Hydrants

Fire Hydrant Type	Number (End of Year)
Normal	5
Flushing	0

Jamestown’s municipal well is 600 ft. deep. This well serves the 230 homes and 16 businesses that are hooked into municipal water. The 2008 current average water flow is 43,000 gallons/day with a design average flow of 650,000 gallons/day. The Town’s current total water capacity is 200,500 gallons. There are no plans at present for any new wells in the future.

Figure 2.2 below shows the future capacity of this water system. As indicated, the system is operating at 9% and 11% capacity (based on flow) at this time. This figure is calculated on the past and projected population of households in the sanitary district. Jamestown also has 540 households and 36 businesses with private wells in the Town.

2.4.5 SPECIAL SERVICE DISTRICT

A special purpose district is an area designated to perform specific tasks essential to a community's or region's well being. It requires a government entity responsible for oversight of the district. Special districts include sanitary districts, metropolitan sewerage districts, drainage districts, inland lake protection and rehabilitation districts, business improvement districts, tax incremental financing districts, architectural conservancy districts, and port authorities. Refer to Chapter 6, Economic Development, for more information. The Town of Jamestown has had a Sanitary District since 1960.

2.4.6 SOLID WASTE DISPOSAL AND RECYCLING FACILITIES

In 1996, Wisconsin revised its solid waste rules to exceed the Federal (Subtitle 'D') rules for municipal solid waste landfills, becoming the first state to receive approval of its solid waste program by the U.S. Environmental Protection Agency. The WI DNR authorizes solid waste disposal pursuant to Wis. Stats. 289.35 and numerous WI Administrative Codes. Refer to the WI DNR and the Department of Planning and Zoning for more information on landfill regulations.

The Town of Jamestown has garbage and recycling pick-up every week. Jamestown does not share these services with any other jurisdiction. The jurisdiction's landfill stopped accepting waste and was closed in 1978.

2.4.7 MUNICIPAL BUILDING AND/OR TOWN HALL

In most towns, the Town Hall is integral to the operation of the local government, providing a location for offices, supplies, and personnel. In some cases, it also serves as a community center. Currently there are no plans for updating the Jamestown Town Hall or garage, or building a new Hall or garage.

Table 2.1 Town Facilities

TYPE OF FACILITY	LOCATION AND ADDRESS	AMENITIES
X TOWN HALL	2135 Elm Street Jamestown, WI	Rest Rooms, Kitchen, Meeting Room, Fire Truck Storage
X TOWN GARAGE	3850 Sandy Hook Road Jamestown, WI	
X MAINTENANCE SHED	3850 Sandy Hook Road Jamestown, WI	
X SALT SHED	1110 Badger Road Jamestown, WI	

2.4.8 PARKS AND RECREATIONAL FACILITIES

Parks and recreational locations might be considered only as part of a jurisdiction’s natural resources; they are, however, also part of a jurisdiction’s facilities and add to community infrastructure and quality of life. The Town of Jamestown has one park: The Jamestown Park, located on Valley Lane. Among services, this park offers water, sewer, and a pavilion.

2.4.9 WIND FARMS

Wind farms are quickly becoming a viable producer for “green” energy. However, they can sometimes be considered problematic to site due to the amount of land they require and their impact on the viewscape. Senate Bill 334, passed in 2003-2004, states that cities, towns, villages, and counties cannot place restrictions on the installment of wind energy systems except in situations where the restriction would serve to protect or preserve public health or safety, where cost does not significantly increase or decrease its efficiency, or where the restriction would provide a new system of comparable cost and efficiency. Therefore, a jurisdiction could indicate on its map where a wind

energy system might be best placed but it cannot ban them altogether. A total ban would have to meet the above criteria of SB 334. Currently there are no wind farms in Jamestown, nor are any proposed for the Town.

2.4.10 CEMETERIES

Cemeteries are identified as prominent historic and cultural resources. They can provide an historic perspective of an area, providing names and ethnicities of previous residents, linking a community to its past. They also can provide greenspace in more urban areas. The Town is served by three cemeteries: Immaculate Conception, located at 3685 Cnt. Hwy HHH in Keiler, WI and privately maintained by the Church; Louisburg Cemetery on Cemetery Hill Road and maintained by the Town of Jamestown, and Fairplay Cemetery, located on 2774 Cnty Hwy 11 in Jamestown and also maintained by the Town.

2.4.11 POLICE, FIRE, AND RESCUE SERVICES

Table 2.3 below lists the types of Police, Fire, and Rescue Service protection available in Jamestown. For more information on whom services are shared with, refer to Chapter 7, Intergovernmental Cooperation.

Table 2.8 Police, Fire, and Rescue Service Protection

TYPE OF PROTECTION	PROVIDER? (NAME AND LOCATION)	STAFFING (I.E. VOLUNTEER, PAID, ETC.)
X FIRE PROTECTION	Jamestown Fire Department	Volunteer
X LAW ENFORCEMENT	Grant County	Paid
	Sheriff's Department	Paid
X EMERGENCY RESPONSE	Dickeyville Rescue Squad	Volunteer
	Hazel Green Rescue Squad	Volunteer
	Jamestown First Responders	Volunteer

2.4.12 LIBRARY FACILITIES

Grant County libraries are part of the Southwest Library System which was created in 1971, when the Wisconsin State Legislature passed a law creating the 17 Library Systems in Wisconsin. The purpose of the system is to provide free and equitable access to public libraries for all residents in Wisconsin even if their community has none. The library system also serves to take on projects too costly or complex for individual community libraries. The funding for the Public Library System comes from a set percentage of the budgets of all public libraries in Wisconsin. Town of Jamestown residents use the services of the Brick Library, located at 500 East Avenue in Dickeyville. Among other services, it offers children's programs, internet, and wireless and is part of the Southwest Library System.

2.4.13 PRIMARY, SECONDARY, AND HIGHER EDUCATION FACILITIES

A quality education system is the foundation of a strong democracy and healthy economy. The New Wisconsin Promise is the State's commitment to ensure a quality education for every child. Raising achievement for all students and closing the achievement gap between economically disadvantaged students, students of color, and their peers is the No. 1 priority.

Residents of the Town of Jamestown attend schools in two public school districts: Cuba City and Southwestern Wisconsin. Table 2.9 highlights the public and private educational facilities available to residents of Jamestown, the current enrollment of these school districts, and their estimated capacity (i.e. the number of students they could effectively teach, using existing facilities). When coupled with projected population numbers, knowing a school's estimated capacity is helpful for all types of planning, including utilities, land use and transportation. Private schools attended by Jamestown children are also listed below, but it is more difficult for a community to plan in conjunction with private schools and therefore enrollment and capacity numbers are not provided for these institutions.

Table 2.9 Education Facilities: Town of Jamestown

SCHOOL NAME	LOCATION	GRADE LEVELS*	CURRENT ENROLLMENT	ESTIMATED CAPACITY
Cuba City School District	Cuba City	E, M, H	658	1350
Immaculate Conception School	Kieler	E, M	Private	Private
Southwestern Wisconsin School District	Hazel Green	E, M, H	565	750

*E = Elementary, M= Middle, H=High School

There are several regional institutions of higher education near the Town of Jamestown, offering a wide variety of educational opportunities including certificates, technical diplomas, associate, bachelor, and master’s degrees. The nearest colleges and universities are located in Fennimore (Southwest Wisconsin Technical College), Platteville (UW - Platteville), Monroe (Blackhawk Tech) Madison (Edgewood College, UW-Madison, Madison Area Technical College) and Dubuque (University of Dubuque, Loras College, and Clarke College).

2.4.14 CHILDCARE FACILITIES

Adequate childcare facilities are of great importance to local and regional economies. The Department of Health and Family Services (DHFS), Division of Children and Family Services (DCFS), Bureau of Regulation and Licensing (BRL) is responsible for the licensing and regulation of child care programs, children’s residential programs and private child welfare agencies for foster care and adoption. The purpose of the Bureau of Regulation and Licensing is to promote the health, safety and welfare of children in regulated community care arrangements. In addition to family and group child care programs, BRL regulates day camps, group foster homes for children, residential care centers for children, and youth shelter care facilities and child placing agencies. Table 2.10 shows the childcare facilities available to Jamestown residents.

Table 2.10 Childcare Facilities

FACILITY NAME	FACILITY LOCATION	AGE LEVELS AND SCHOOL DISTRICT SERVED
Grant County Health Department	Lancaster	All
Grant County Department of Social Services	Lancaster	All
Unified	Lancaster	All

2.4.15 HEALTHCARE FACILITIES

Healthcare facilities are an integral part of a community’s infrastructure. Having access to adequate and supportive healthcare services becomes even more important in areas where a population has large sections of vulnerable individuals: the very young and the very old. In particular, health care services for the elderly are becoming increasingly important as the population of the U.S. grows older. The trend of an aging population is found throughout Grant County, the State of Wisconsin, and the Country as a whole. Table 2.11 lists the medical care facilities that are either in the Town of Jamestown or that serve the residents of the Town.

Table 2.11 Healthcare Facilities

FACILITY NAME	FACILITY LOCATION
Hospitals: Mercy, Finley & Southwest Hospitals	Dubuque, Iowa Lancaster & Platteville
Medical Clinic: Medical Associates Clinic Finley	Dubuque, Iowa
Nursing Homes:	Lancaster, Platteville, Cuba City
Assisted Living Facility:	Lancaster & Platteville
Chiropractors: Dr. Otto & Ben Vogt	Dickeyville

Table 2.11 (cont.) Healthcare Facilities

FACILITY NAME	FACILITY LOCATION
Dentist:	Many in Dubuque
Optometrist:	Many in Dubuque
Podiatrist:	Many in Dubuque

2.4.16 TELECOMMUNICATION FACILITIES

Telecommunication towers, specifically cellular phone towers, are on the rise with increased use of cellular phones. Refer to the Federal Communications Commission FCC - (www.wireless2.fcc.gov) or the Grant County Planning and Zoning Committee for more information on telecommunication regulations in the County.

Jamestown has several cell tower in its jurisdiction (refer to Map 2.2 for locations) but as of yet the Town has not identified any potential future locations for towers, including co-located towers.

2.4.17 POWER PLANTS AND TRANSMISSION LINES

Grant County’s power needs are supplied by the Alliant/ Wisconsin Power and Light Company. For information regarding their service territories, transmission lines, and substations, please refer to Map 2.2. Utility services in Jamestown include Charter cable, and TDS internet services.

2.4.18 POSTAL SERVICE

Post Offices are located in most Grant County communities. Town residents are served by the Sinsinawa Post Office, Keiler Post Office, Cuba City Post Office, and Hazel Green Post Office.

2.5 CAPITAL IMPROVEMENTS PLANS

A capital improvements plan (CIP) is a multi year scheduling of physical public improvements based on the examination of available fiscal resources, as well as the prioritization of such improvements. Capital improvements are those that include new or expanded physical facilities that are relatively large, expensive, and permanent. Street improvements, public libraries, water and sewer lines, and park and recreation facilities are common examples of capital improvements. The Town of Jamestown does not have a CIP or a 5 or 10 year utility plan at this time.

2.6 UTILITY AND COMMUNITY FACILITY AGENCIES AND PROGRAMS

A number of State agencies and programs exist to assist communities with public works projects. Below are brief descriptions of many of these agencies and programs. Contact information is provided for each. To obtain more information about each or to learn which program best fits specific needs contact the agency directly.

UNITED STATES DEPARTMENT OF AGRICULTURE – RURAL DEVELOPMENT (USDA-RD)

COMMUNITY FACILITIES DIRECT GRANT AND LOAN PROGRAM

The community facilities grant program provides grants to assist the development of essential community facilities in rural areas and towns of up to 20,000 people. The objective of the agency is to construct, enlarge, extend, or otherwise improve community facilities providing essential services to rural residents. This can include the purchase of equipment required for a facility’s operation. All projects that are funded by the RHS grant program must be for public use.

USDA RURAL DEVELOPMENT OF WISCONSIN

**4949 Kirschling Ct
Stevens Point, WI 54481**

**Phone: (715) 345-7615
FAX: (715) 345-7669
<http://www.rurdev.usda.gov/wi/>
<http://www.rurdev.usda.gov/rhs/>**

COMMUNITY FACILITIES GUARANTEED LOAN PROGRAM

The Community Facilities Loan Program is similar to the Grant and Loan Program above in that it provides funding for essential community facilities, such as schools, roads, fire halls, etc. Again local jurisdictions must have a population of less than 20,000 to be able to apply. Applications are funded based on a statewide priority point system. For more information on the loan program, log on to the USDA-RD website or call the office listed above.

UNITED STATES DEPARTMENT OF AGRICULTURE – RURAL UTILITIES

There are a number of available programs through USDA-RUS as part of the Water and Environmental Programs (WEP). WEP provides loans, grants, and loan guarantees for drinking water, sanitary sewer, solid waste, and storm drainage facilities in rural areas, cities, and towns of 10,000 or less. Public bodies, non-profit organizations and recognized Indian Tribes may qualify for assistance. WEP also makes grants to non-profit organizations to provide technical assistance and training to assist rural communities with their water, wastewater, and solid waste programs. Some of the available programs include:

- Water and Waste Disposal Direct and Guaranteed Loans,
- Water and Waste Disposal Grants,
- Technical Assistance and Training Grants,
- Solid Waste Management Grants,
- Rural Water Circuit Ride Technical Assistance.

**UNITED STATES DEPARTMENT OF AGRICULTURE (USDA) NATURAL RESOURCE CONSERVATION (NRCS)
UNITED STATES ENVIRONMENTAL PROTECTION AGENCY (US EPA) COOPERATIVE STATE RESEARCH
EDUCATION EXTENSION SERVICE (CSREES)**

FARM*A*SYST

Farm*A*Syst is a national program cooperatively supported by the above agencies. The program enables you to prevent pollution on farms, ranches, and in homes using confidential environmental assessments. This program can help individuals determine his or her farm risks. A system of fact sheets and worksheets helps to identify the behaviors and practices that are creating risks. Some of the issues Farm*A*Syst can help address includes:

- Quality of well water, new wells, and abandoned wells,
- Livestock waste storage,
- Storage and handling of petroleum products,
- Managing hazardous wastes,
- Nutrient management.

Farm*A*Syst is a voluntary program, so individuals decide whether to assess their own property. The program has been nationally and internationally recognized for its common-sense approach to managing environmental risks. Contact the Farm*A*Syst office for more information on available programs.

HOME*A*SYST

Also available through the cooperative efforts of USDA, NRCS, CSREES, and US EPA is the national Home*A*Syst program. This program is very similar to the Farm*A*Syst program explained above, but instead is specific to homes. The program begins with a checklist to identify risks including safety of drinking water, use and storage of hazardous chemicals, and lead based paint. The program can help a person to develop an action plan to reduce risks. Contact the Home*A*Syst program to find out more information and to obtain worksheets to begin your assessment today.

--

WISCONSIN DEPARTMENT OF NATURAL RESOURCES (WIDNR)

BUREAU OF COMMUNITY FINANCIAL ASSISTANCE (DNR-CFA)

The Bureau of Community Assistance administers a number of grant and loan programs. The Bureau supports projects that protect the public health and the environment and provide recreational opportunities. The Bureau has three major areas of programs, which include the following:

- **Environmental Loans:** This is a loan program for drinking water, wastewater, and brownfield projects.
- **Environmental Financial Assistance Grants:** This is a grant program for non-point source runoff pollution, recycling, lakes, rivers, municipal flood control and well compensation.
- **Land and Recreation Financial Assistance Grants:** This is a grant program for conservation, restoration, parks, stewardship, acquisition of land and easements for conservation purposes, recreational facilities and trails, hunter education, forestry, forest fire protection, gypsy moth, household hazardous waste collection, dam rehabilitation and abandonment, dry cleaner remediation, and urban wildlife damage.

WISCONSIN DEPARTMENT OF NATURAL RESOURCES (WI-DNR)
 101 S Webster St
 Madison WI 53703
 Phone: 608-266-2621
 Fax: 608-261-4380
<http://www.dnr.state.wi.us>

These programs listed above are the major program headings. There are numerous programs available for specific projects underneath these umbrella programs. For example, under the Environmental Loans Program, there is the Safe Drinking Water Loan Program (SDWLP). The SDWLP provides loans to public water systems to build, upgrade, or replace water supply infrastructure to protect public health and address federal and state safe drinking water requirements. For more information on other available programs, contact the Wisconsin DNR or visit the website listed above.

WISCONSIN WELL COMPENSATION GRANT PROGRAM

Another program available through the Wisconsin DNR is the Well Compensation Grant Program. To be eligible for a grant, a person must own a contaminated private water supply that serves a residence or is used for watering livestock. Owners of wells serving commercial properties are not eligible, unless the commercial property also contains a residential unit or apartment. The Well Compensation grant program provides partial cost sharing for the following:

- Water testing if it shows the well is contaminated,
- Reconstructing a contaminated well,
- Constructing a new well,
- Connecting to an existing private or public water supply,
- Installing a new pump, including the associated piping,
- Property abandoning the contaminated well,
- Equipment for water treatment,
- Providing a temporary bottled or trucked water supply.

WISCONSIN DEPARTMENT OF COMMERCE

WISCONSIN COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM PUBLIC FACILITIES (CDBG-PF)

This program is designed to assist small communities with public facility improvements. Eligible activities would include publicly owned utility system improvements, streets, sidewalks, disability accessibility projects, and community centers. Local governments including towns, villages, cities, and counties are eligible. Entitlement cities, over 50,000 in population, are not eligible. Federal grant funds are made available on an annual basis. The maximum grant for any single applicant is \$750,000. Grants are only available up to the amount that is adequately justified and documented with engineering or vendor estimates.

**WI DEPARTMENT OF COMMERCE
 DIVISION OF COMMUNITY DEVELOPMENT**
 PO Box 7970
 Madison, WI 53707

 Fax: 608-266-8969
<http://www.commerce.state.wi.us>
<http://www.rurdev.usda.gov/rhs/>

WISCONSIN COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM PUBLIC FACILITIES (CDBG-PFED)

This program helps underwrite the cost of municipal infrastructure necessary for business development. This program requires that the result of the project will ultimately induce businesses, create jobs, and invest in the community. More information can be obtained from the Wisconsin Department of Commerce.
