

Section H

LAND USE ELEMENT

EXECUTIVE SUMMARY

The purpose of this section is to review and analyze land use in the City of Dodgeville. The land use element is the compilation of all other elements of this plan. Designating land uses and standards for development requires the City be able to adequately provide utilities, maintain roads, and support other services. Therefore, the goals, objectives, and policies of the land use element must be supported by all other elements of the plan. This section will consider both current and future land use in the City of Dodgeville. At the present time, the dominant developed land use is residential.

**Wisconsin State Statute 66.1001(2)(h)****(h) Land-use element.**

A compilation of objectives, policies, goals, maps and programs to guide the future development and redevelopment of public and private property. The element shall contain a listing of the amount, type, intensity and net density of existing uses of land in the local governmental unit, such as agricultural, residential, commercial, industrial and other public and private uses. The element shall analyze trends in the supply, demand and price of land, opportunities for redevelopment and existing and potential land-use conflicts. The element shall contain projections, based on the background information specified in par. (a), for 20 years, in 5-year increments, of future residential, agricultural, commercial and industrial land uses including the assumptions of net densities or other spatial assumptions upon which the projections are based. The element shall also include a series of maps that shows current land uses and future land uses that indicate productive agricultural soils, natural limitations for building site development, floodplains, wetlands and other environmentally sensitive lands, the boundaries of areas to which services of public utilities and community facilities, as those terms are used in par. (d), will be provided in the future, consistent with the timetable described in par. (d), and the general location of future land uses by net density or other classifications.

LAND USE POLICIES

The following are the land use policies (not in order of priority) for the City of Dodgeville.

- 1. Follow a current, long-range comprehensive plan, which serves as a guide for future land-use and zoning decisions.**

See Map H.1 and the [City Zoning Map](#) (Pocket # H-1) at the end of this Section for more information.

- 2. Maintain the small-town character of the jurisdiction by avoiding developments that would alter its character.**

See Section A, Issues and Opportunities Element for the City of Dodgeville's Vision Statement. Contact the City Offices for the City of Dodgeville Historic Preservation Ordinance and Zoning Ordinances.

- 3. Restrict non-residential development from residential neighborhoods.**

Contact the City Offices for Zoning Ordinances. See Map H.1 and the [City Zoning Map](#) (Pocket # H-1) at the end of this Section for more information.

- 4. Encourage commercial activities to develop in existing commercial locations where public roads/facilities and services have capacity to accommodate high volumes of traffic, parking, and other public needs.**

Contact the City Offices for Zoning Ordinances. See Map H.1 and the [City Zoning Map](#) (Pocket # H-1) at the end of this Section for more information.

- 5. Encourage development in areas where adequate utilities and community services exist or can be provided in a cost efficient manner.**

See Section D, Utilities and Community Facilities Element for more information.

- 6. Restrict development from areas shown to be unsafe or unsuitable for development due to natural hazards, contamination, access, or incompatibility problems.**

- 7. Ensure to the greatest extent possible that all future development proposals or redevelopment enhances the overall quality of life in the community.**

See Section A, Issues and Opportunities Element for the City of Dodgeville's Vision Statement.

- 8. Protect active agricultural lands that exist in, or border on the jurisdiction from encroachment by incompatible uses.**

See Section E, Agricultural, Natural, and Cultural Resources for more information. Also, contact the City Offices for the Agricultural District Zoning Ordinance.

EXISTING LAND USE

The City of Dodgeville is classified as a predominantly agricultural and commercial based community. See Maps E.2 and E.8 in Section E, Agricultural, Natural, and Cultural Resource Element, for existing Dodgeville land use maps. The Plan Commission identified agriculture, commercial-business, manufacturing/industrial, single- and multi-family residential, parks/open space, and mixed use (residential and commercial) as the currently existing land uses in the City of Dodgeville.

Table H.1 is a breakdown by percentage for Dodgeville land uses. The largest land use within the City is agricultural, with single-family residential as second largest.

Table H.1: City of Dodgeville Land Use

Classification	City of Dodgeville Percent of Land Area
Agricultural	35%
Residential (Single- and Multi-Family)	28%
Commercial	23%
Manufacturing	1%
Production Forest	1%
DNR-MFL Forest	0%
Non-developable	2%
Other (Federal, State, County, School, Cemetery)	10%

(Source: 2004 City of Dodgeville Assessor's Office)

Agricultural

At 35 percent, agriculture is the dominant land type assessed in Dodgeville. Agricultural land includes land that produces a crop (including Christmas trees and apple orchards), agricultural forest (forested lands contiguous with agricultural land), and commercial land that supports agriculture.

Residential

Table H.1 indicates that residential land use accounts for 28 percent of the land area within the City.

Commercial

Commercial refers to any parcel that has a business on it, but does not include industrial properties. This may be a convenience store, car wash, bank, grocery store, tavern, etc., referring to any type of retail or business establishment. The existing land use map does not differentiate between highway businesses, home occupations, or general businesses, but classifies all of the above as commercial. In the City of Dodgeville, commercial development occupies approximately 23 percent of the total land area. It is the third largest classified land use in the City.

Manufacturing

Manufacturing refers to business and industry that is engaged in processing, manufacturing, packaging, treatment, or fabrication of materials and products. As indicated by Table H.1 manufacturing occupies 1 percent of the land use in the City of Dodgeville.

Forested

This classification is Production Forests and DNR-MFL Forests acreages combined. Table H.1 shows approximately 1 percent of the City as forest under these classifications.

Non-developable

This classification refers to areas that were formerly classified as swamp/waste and refers to open land such as bogs, marshes, lowlands brush land, and uncultivated land zoned as shoreland and shown to be wetland. Two percent of the land area in the City of Dodgeville is undevelopable under these classifications.

Other

Remaining land types classified as "other" are federal, state, and county lands, school property, and cemeteries. Approximately 10 percent of land in the City of Dodgeville is listed under this classification. Refer to Maps E.2, E.8, and E.15 in Section E, Agricultural, Natural, and Cultural Resource Element and Map H.1 and the City Zoning Map (Land Use Map Pocket #1), at the end of this Section for more information.

Table H.2: City of Dodgeville Land Use Assessment Statistics Iowa County – 1993

Real Estate Class	# of Parcels	Land Value
Residential	987	\$4,745,400
Commercial	181	\$1,255,800
Manufacturing	8	\$104,500
Agricultural	67	\$485,900
Swamp & Waste	N/A	N/A
Forest	N/A	N/A

(Source: Wisconsin Department of Revenue-1993)

Table H.3: City of Dodgeville Land Use Assessment Statistics Iowa County – 2004

Real Estate Class	# of Parcels	Land Value
Residential	1624	\$35,249,900
Commercial	309	\$15,088,000
Manufacturing	10	\$174,900
Agricultural	50	\$161,600
Swamp & Waste	N/A	N/A
Forest	1	\$19,000

(Source: Wisconsin Department of Revenue-2004)

RESIDENTIAL LAND USE TRENDS

Residential land use occupies 4.3 percent of Dodgeville. Table H.4 indicates changes in single-family residential units between 1990 and 2000 for the City of Dodgeville compared to Iowa County. A more accurate comparison between the City and the County cannot be made with Census 2000 data.

Table H.4: City of Dodgeville Single Family Housing Unit Change

	1-Unit (1990)	1-Unit (2000)	% Change
City of Dodgeville	1,147	1,330	16.0%
Iowa County	6,632	7,796	17.6%

(Source: 1990 & 2000 US Census)

As indicated by Table H.4, single housing units in Dodgeville increased 16.0 percent between 1990 and 2000, keeping up with overall single housing unit growth in the County, which increased 17.6 percent in the same time period.

As far as future residential development is concerned, the Plan Commission lists a number of factors that could impact housing, such as proximity to schools, safety, access to arterials (transportation), infrastructure needs (water and sewer), and parks.

IDENTIFICATION OF SMART GROWTH AREAS

The City of Dodgeville Comprehensive Plan identifies smart growth areas in Section H of the plan (see Map H.1). Smart growth areas have been defined in this process as parts of the jurisdiction suitable for future development. Map H.1 for the City of Dodgeville shows smart growth areas future residential development.

LAND USE PROJECTIONS

Table H.5 shows future residential land use projections for the City of Dodgeville, derived from Section A, Issues and Opportunities of the Comprehensive Plan. 2005 high and low projection data comes from the City of Dodgeville Assessor's Office. See page A-8.

Table H.5: Land Use Projections 2000 - 2030

PROJECTED RESIDENTIAL LAND USE	2000	2005	2010	2020	2030
High Projection	1751	1982	2160	2560	3000
Change in Number of Households	--	231	178	400	440
3 Dwelling Units Per Acre	--	77.0	59.3	133.3	146.6
5 Dwelling Units Per Acre	--	46.2	35.6	80	88
Low Projection	1751	1941	2079	2218	2500
Change in Number of Households	--	190	138	139	282
3 Dwelling Units Per Acre	--	63.3	46.0	46.3	94
5 Dwelling Units Per Acre	--	38.0	27.6	27.8	56.4

REDEVELOPMENT OPPORTUNITIES

The City will investigate redevelopment opportunities on an individual basis.

FUTURE EXPANSION

As Dodgeville grows, it makes sense to look ahead and project what sort of development will work best in certain parts of the City. Current and future infrastructure can help guide the City's development decisions. Table H.6 shows what parts of the City are most suitable for different types of development.

Retail, commercial, and industrial developments have been identified by the Plan Commission to be the necessary components to Dodgeville's healthy growth. Future commercial development needs to take into account proximity to transportation networks, as well as commercial development infrastructure needs. Industrial and manufacturing development also needs to consider proximity to transportation networks, infrastructure needs, and how the demands of such development might impact Dodgeville's labor force.

Land uses that might harm the City's efforts to achieve its vision are listed on page H-11.

Table H.6: Best Directions For Future Expansion In The City Of Dodgeville

	Retail	Commercial	Industrial	Housing
Transportation	N & NE	N & NE	N & NE	E, W & S
Water	N & NE	N & NE	N & NE	No limitations
Sewer	N & NE	N & NE	N & NE	N,S,E,W

EXISTENCE OF BROWNFIELDS OR PROPERTIES SUITABLE FOR REDEVELOPMENT

The Wisconsin Department of Natural Resources maintains a database referred to as BRRTS (Bureau for Remediation and Redevelopment Tracking System). The database lists contaminated lands and sites in Iowa County and includes the following: spills, leaks, Superfund sites, and other contaminated sites that have been reported to us or otherwise discovered. The database contains 68 records for Dodgeville (the list does not distinguish between types of jurisdiction with the same name), and includes the following four categories:

LUST: A Leaking Underground Storage Tank that has contaminated soil and/or groundwater with petroleum. Some LUST cleanups are reviewed by DNR and some are reviewed by the Dept. of Commerce.

ERP: Environmental Repair Program sites are sites other than LUSTs that have contaminated soil and/or groundwater. Often, these are old historic releases to the environment.

SPILLS: A discharge of a hazardous substance that may adversely impact, or threaten to adversely impact public health, welfare or the environment. Spills are usually cleaned up quickly.

No Action Required: There was or may have been a discharge to the environment and, based on the known information, DNR has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge. Reports of UST closures with no action required are filed in state archives.

The complete database is available from the Department of Natural Resources Website <http://www.dnr.state.wi.us>. Activities on these sites including remediation are available for review on the website or by contacting the Wisconsin Department of Natural Resources. The following listings contain the DNR Activity Number, Activity Type, Activity Name, Municipality, County, and a Priority Level. As stated above, additional information is available from the Wisconsin Department of Natural Resources.

EXISTING AND POTENTIAL LAND USE CONFLICTS

There are a variety of land uses that can potentially cause land use conflicts. Two common acronyms used to describe land use conflicts are NIMBY's (Not in My Back Yard) and LULU's (Locally Unwanted Land Uses). One of the most common occurrences, especially in rural settings, is the presence of agricultural operations near non-farm populations.

Agriculture can affect adjoining small rural lots, which are used essentially for residential purposes. Similarly, the presence of small rural lots creates an adverse influence on the continued operation of agricultural enterprise. The issue of rural-urban conflict can arise when there is no separation between incompatible uses. Land use conflicts may arise in such situations through noise, odor, farm chemicals, light, visual amenity, dogs, stock damage, and weed infestation, lack of understanding, and lack of communication to name a few. However, as the box on the right suggests, conflicts can arise from more than agriculture/residential situations.

Potential Land Use Conflicts

- Landfills or Waste Facilities
- Jails or Prisons
- Halfway Houses or Group Homes
- Airports, Highways, Rail Lines
- Low Income Housing
- Strip Malls and Shopping Centers
- "Cell" Towers, Electrical Transmission Lines
- Large Livestock Operations
- Industrial or Manufacturing Operations

Land use conflicts in Dodgeville exist in general and limited industrial uses (i.e. "dirty" businesses such as asphalt plants) within the City's highway business district. Another possible conflict is the presence of three homes within the setback of the City's wastewater treatment facility. However, these homes were built prior to the plant's construction, and were grandfathered in. If the plant were to expand, problems could develop between the plants and the homes.

Other anticipated land use conflicts in the City of Dodgeville include expanded animal agriculture, lot development issues, "leap frog" development, annexation of commercial property, and problems between scattered residential areas and proposed commercial and industrial areas adjacent to them. Refer to Appendix B-1: *"Market Study - For residential development of a site near downtown Dodgeville"* for more discussion on a possible approach to creating mixed residential development near the downtown commercial district.

INTEGRATED LAND USE

Certainly education and communication at all levels is fundamental to land use conflict resolution. Finding a ways to separate incompatible land uses while recognizing the benefits that can be achieved through land use integration are key. Integration may be achieved through physical separation or a simple vegetative buffer designed to screen one land use from another. Such practical strategies require landowners with potentially conflicting land uses to acknowledge their impacts and then design their operations or development to account for this impact. A community approach utilizing physical solutions, planning strategies, and a long-term vision for the land will enable multiple and differing land uses to exist.

FUTURE LAND USE

Small-town atmosphere and being near family and friends and ones job, are the top reasons why people choose to live in the City of Dodgeville. It stands to reason that people in Dodgeville want to maintain their homes and property, protect their investments, and improve their standard of living. However, with

Dodgeville's growth, existing homes and buildings will need remodeling, repairs, or improvements, new buildings will be constructed; businesses will join the community. In order to achieve its vision, Dodgeville needs to maintain its small-town charm, while making the City a desirable place to work and live.
