

LAND USE ELEMENT

EXECUTIVE SUMMARY

The purpose of this section is to review and analyze land use in the Town of Mineral Point. The land use element is the compilation of all other elements of this plan. Designating land uses and standards for development requires the Town to be able to adequately provide utilities, maintain roads, and support other services. Therefore, the policies and programs of the land use element must be supported by all other elements of the plan. This section will consider both current and future land use in the Town of Mineral Point. At the present time, the dominant developed land use in the Town is agricultural.

Wisconsin State Statute 66.1001(2)(h)

(h) *Land-use element.*

A compilation of objectives, policies, goals, maps and programs to guide the future development and redevelopment of public and private property. The element shall contain a listing of the amount, type, intensity and net density of existing uses of land in the local governmental unit, such as agricultural, residential, commercial, industrial and other public and private uses. The element shall analyze trends in the supply, demand and price of land, opportunities for redevelopment and existing and potential land-use conflicts. The element shall contain projections, based on the background information specified in par. (a), for 20 years, in 5-year increments, of future residential, agricultural, commercial and industrial land uses including the assumptions of net densities or other spatial assumptions upon which the projections are based. The element shall also include a series of maps that shows current land uses and future land uses that indicate productive agricultural soils, natural limitations for building site development, floodplains, wetlands and other environmentally sensitive lands, the boundaries of areas to which services of public utilities and community facilities, as those terms are used in par. (d), will be provided in the future, consistent with the timetable described in par. (d), and the general location of future land uses by net density or other classifications.

TOWN OF MINERAL POINT STATEMENT REGARDING LAND USE

General information about residential siting in the Town of Mineral Point

It is important to meet with the Town Planning Commission before you incur development costs to determine whether your project is compatible with the Town plan. In general, the Town plan seeks to:

- 1) Preserve agricultural opportunities – the Township discourages residential development of productive agricultural land and the fractionalization (breaking up) of large tracts of productive farmland.
- 2) Retain rural character – residential development should be situated to minimize its visual effect on the landscape, especially as viewed from public roadways.

New residences should not be built on productive agricultural lands and should not be highly visible from public roadways.

Cluster housing (up to four residences per driveway) is allowed in the Township.

Subdivisions are not permitted in the A-1 Agricultural District.

Residential development is encouraged in the Mineral Point Territorial Zone (near the city of Mineral Point) but not in the outlying areas.

LAND USE POLICIES

The following are the land use policies for the Town of Mineral Point.

- **Maintain a current, long-range development plan, which will serve as a guide for future land-use and zoning decisions.**
- **Protect active agricultural lands from encroachment by incompatible uses.**

Agricultural, especially family farms and “added value” farm enterprises (i.e. farmer’s market-type operations where produce is sold directly from the grower to the consumer), is integral to Mineral Point achieving its vision.

See Section E, Agricultural, Natural, and Cultural Resources Element, Section A, Issues and Opportunities Element, and the Town of Mineral Point’s Comprehensive Plan Introduction for more information.

- **Maintain the small-town character of the jurisdiction by avoiding developments that would alter its character.**

Scattered development can hurt the economic vitality of farming by driving land prices up and fragmenting productive farmland. Mineral Point’s sense of community and farming heritage is compromised when farming gives way to land uses other than traditional agriculture.

For more information, see the Town of Mineral Point’s Comprehensive Plan Introduction, Section A, Issues and Opportunities Element for the Town of Mineral Point’s Vision Statement, Section I, Implementation Element for the Town’s rural residential siting criteria, and the Future Land Use map (Map H-1).

- **Restrict location of new development from areas shown to be unsafe or unsuitable for development due to natural hazards, contamination, access, or incompatibility problems.**

Residential development needs to be positioned so that houses do not obstruct views. Some building requirements might include building below the ridgeline, placing the residence farther off roads, or building unobtrusively near or within wooded areas. Such easements and restrictions on development will help the Town protect its magnificent views. Buffering development through the use of vegetation) can also maintain the viewscape while still allowing development.

Lots sizes must be 1 to 2 acres for cluster housing, with enough room designated for a septic system that includes a second location in case the original fails. See the Town's rural residential siting criteria in Section I, Implementation Element for more information.

- **Encourage commercial and industrial/manufacturing activities to develop in existing commercial, industrial, and manufacturing locations where public roads/facilities and services have capacity to accommodate high volumes of traffic, parking, and other public needs.**

Commercial development must not obstruct viewscales. Careful placement is vital, particularly along the State Highway 151 corridor. See the Town's commercial siting criteria in Section I, Implementation Element for more information.

- **Encourage development in areas where adequate utilities and community services exist or can be provided in a cost efficient manner.**
- **Assure to the greatest extent possible that all proposals for future development or redevelopment enhance the overall quality of life.**

Protect historic sites both by encouraging the basic protection of historic sites as well as siting any development near historic sites as sympathetically as possible.

Developing a Town park should be pursued, as it will enhance residents' quality of life. See Section A, Issues and Opportunities Element for the Town of Mineral Point's Vision Statement, and the Town of Mineral Point's Comprehensive Plan Introduction for more information.

LAND USE POLICIES - For Rural Residential Siting Criteria

1. Meet with Mineral Point Township Planning Commission to determine project compatibility with goals of the Township. (May include various on-site visits.)

The first step in any development project is to pick up a "development packet" from the county zoning administrator or Town clerk. This packet will include key points from the Town comprehensive plan and the necessary steps to follow. After reviewing the packet, the individual must meet with the Planning Commission. The Commission will help determine whether the proposed project is compatible with the Town comprehensive plan. This would include a review of the Town land use map, Town ordinances and compliance with the density standard. The meeting would also lay-out the steps required to comply with the other siting criteria including:

- minimum lot size, driveway standards, determination of crop or agricultural use history, compatibility with surrounding land uses and a visual impact determination.
- items that must be handled at the county level including well, septic, floodplain, wetland and zoning issues.

An on-site visit may be scheduled at this time with members of the Commission.

2. Density Standard (1 development right per 40 acres)

Residential development is not encouraged in the agricultural areas of the Township. However, a residence may be allowed if the 40 acre density standard is met. Existing residences count against the density standard. There are two ways to meet the density standard:

- 1) The individual owns 40 or more acres and changes the zoning of at least 40 acres to A-1C (Exclusive Agricultural Conservancy Overlay District).
- 2) The individual purchases at least 1 acre from a landowner who either:
 - a. changes the zoning of the balance of the attached 40 acre parcel, or
 - b. changes the zoning of a separate 40 acre parcel to the A-1C (Exclusive Agricultural Conservancy Overlay District). The 40 acre parcel must be owned by the seller and can be either adjoining or non-adjoining to the proposed residence. (The description of the A-1C Exclusive Agricultural Conservancy Overlay District is included in the Iowa County Zoning Ordinance.)

The Township of Mineral Point will not approve an application for removal of lands from the A-1C Exclusive Agricultural Conservancy Overlay District unless future Township-wide reviews of the comprehensive plan (via Class One Notice Public Hearings and/or referendum) indicate residents no longer favor having agriculture as the defining feature of the Township.

“Development rights” are determined by adding up all of the Township acreage owned by an individual landowner and dividing by 40 acres. The resulting **whole** number is the number of “development rights” available to that landowner. If the **remainder** number is 30 acres or greater, an additional “development right” is available.

Number of Acres Owned	# of Development Rights
0-40.0	1
40.1-69.99	1
70.00 – 109.99	2
110.00 – 149.99	3
150.00 – 189.99	4
190.00 – 229.99	5
230.00 – 269.99	6
270.00 – 309.99	7
310.00 – 349.99	8

For Acres Larger than provided in the chart – see Town Clerk.

Substandard vacant lots of between 2 acres and 40 acres are eligible for a “development right.”

2.1. Substandard Parcels

Parcels of land that are less than 40 acres but more than 2 acres may qualify for a single development right. These parcels must not have a residence on them as of January 1, 2004 and must have been recorded at the Register of Deeds Office at the Iowa County Courthouse as of January 1, 2004. The proposed development must meet all of the other criteria in Table A and Table B in Section I, Implementation Element.

3. Compliance with Land Use Map

The Township land use map will be consulted to determine compatibility and whether the project is in the Township or in the Mineral Point Extra Territorial Zone.

4. Compliance with Town Ordinances

Applicable Township ordinances will be reviewed to determine compliance.

5. Minimum lot size (1 acre)

The minimum lot size for new residential construction is one acre.

6. Compatibility with Surrounding Land Uses

The Township Planning Commission and Town Board hold the right to inform and consult with neighbors and any others who may be affected by the proposed project to determine compatibility with surrounding land uses. *It is the responsibility of the applicant to send a letter (via registered mail) describing the project to all adjoining landowners. Applicant must provide proof to the planning commission (in the form of postal receipts) that letters were delivered.*

7. Agricultural Impact Determination

A determination will be made as to the *present and future* impact the proposed development will have on Township agriculture. The Township discourages any development that fractionalizes large tracts of farmland. Destruction of farmland must be kept to a minimum.

Crop history and past agricultural use may be determined by county aerial photos (1968, 1976, 1995, 2005) and/or by documents from the Iowa County Land Conservation Department.

8. Visual Impact determination

A site visit by Planning Commission members and photographs of the site will help determine the visual impact of the proposed project. The Commission and the Town Board hold the right to suggest locations that will help minimize the visual impact of the project. It is expected that the Township and the individual will work together to site the project in such a way as to minimize visual impact.

9. Compliance with Township Driveway Ordinance

The Township enforces a driveway ordinance. Issues include access to public roadways and construction requirements including driveway base, slope and width.

10. Site Map

The individual is expected to provide a site map showing existing site features including structures, driveways, field roads, fields, slopes, etc.

11. Good Neighbor Policy

The Town of Mineral Point has adopted a good neighbor policy which is included as Appendix H-1. This policy should be reviewed by all potential land owners.

EXISTING LAND USE

The Town of Mineral Point is classified as a predominantly agricultural community. See Maps E.2 and E.8 in Section E, Agricultural, Natural, and Cultural Resource Element, for Mineral Point land use maps.

Table H.1 is a breakdown by percentage for land uses in Mineral Point. As indicated, the Iowa County Tax Assessors Office defines the Town as 87.6 percent agricultural land.

Table H.1: Town Of Mineral Point Land Use

Classification	Town of Mineral Point Percent of Land Area
Agricultural	87.6%
Residential (Single- and Multi-Family)	1.2%
Commercial	0.6%
Manufacturing	0.2%
Production Forest	3.0%
DNR-MFL Forest	1.3%
Undeveloped (formerly Swamp/Waste)	3.4%
Other (Federal, State, County, School, Cemetery)	2.6%

(Source: 2003 Iowa County Tax Assessor Department, SWWRPC)

Agricultural

Agriculture is the dominant developed land use in Mineral Point, with 87.6 percent occupying the Town's land area. Agricultural land includes land that produces a crop (including Christmas trees or ginseng), agricultural forest (forested lands contiguous with agricultural land), supports livestock, or is eligible for enrollment in specific federal agricultural programs.

Residential

As indicated by Table H.1, residential land use accounts for 1.2 percent of the land area within the Town.

Commercial

Commercial refers to any parcel that has a business on it, but does not include industrial properties. This may be a convenience store, car wash, bank, grocery store, tavern, etc., referring to any type of retail or business establishment. The existing land use map does not differentiate between highway businesses, home occupations, or general businesses, but classifies all of the above as commercial. In the Town of Mineral Point, commercial development occupies approximately 0.6 percent of the total land area.

Manufacturing

Manufacturing refers to business and industry that is engaged in processing, manufacturing, packaging, treatment, or fabrication of materials and products. As indicated by Table H.1, manufacturing land uses occupy 0.2 percent of Mineral Point's land area.

Forested

This classification is Production Forests and DNR-MFL Forests acreages combined. Table H.1 shows approximately 4.3 percent of the land area in Mineral Point is forest under these classifications.

Undeveloped

This classification refers to areas that were formerly classified as swamp/waste. It is open land includes bogs marshes, lowlands brush land, and uncultivated land zoned as shoreland and shown to be wetland. Approximately 3.4 percent of the total land in the Town of Mineral Point is classified as undeveloped land.

Other

Remaining land types that do not fall into the above categories, including federal, state, and county lands, school property, and cemeteries are classified as "other". Approximately 2.6 percent of land in the Town of Mineral Point is listed under this classification. Refer to Maps E.2 and E.8, Section E, Agricultural, Natural, and Cultural Resource Element, and Table H.1 for more information.

LAND USE TRENDS**Table H.2: Town of Mineral Point Land Use Assessment Statistics Iowa County – 1994**

Real Estate Class	# of Parcels	Land Value
Residential	166	\$857,950
Commercial	35	\$445,350
Manufacturing	2	\$142,000
Agricultural	1,182	\$15,875,700
Swamp & Waste	--	--
Forest	87	\$289,800

(Source: Wisconsin Department of Revenue-1994)

Table H.3: Town of Mineral Point Land Use Assessment Statistics Iowa County – 2004

Real Estate Class	# of Parcels	Land Value
Residential	244	\$4,974,900
Commercial	44	\$887,900
Manufacturing	3	\$183,000
Agricultural	1,260	\$4,293,600
Swamp & Waste	--	--
Forest	102	\$2,940,100

(Source: Wisconsin Department of Revenue-2004)

LAND USE TRENDS - RESIDENTIAL

Residential land use occupies 1.2 percent of the Town of Mineral Point. The following table indicates changes in single-family residential units between 1990 and 2000 for the Town of Mineral Point compared to Iowa County.

Table H.4: Town Of Mineral Point Single Family Housing Unit Change

	1-Unit (1990)	1-Unit (2000)	% Change
Town of Mineral Point	246	276	12.2%
Iowa County	6,632	7,796	17.6%

(Source: 1990 & 2000 US Census)

According to the 1990 and 2000 US Census, Table H.4 indicates that the single housing units in Mineral Point increased 12.2 percent between 1990 and 2000, while single housing units in Iowa County increased 17.6 percent.

IDENTIFICATION OF SMART GROWTH AREAS

The Town of Mineral Point Comprehensive Plan identifies smart growth areas in Section H of the plan, areas defined by this process as places that make sense for future development. Map H.1 indicates the smart growth areas for future residential development in the Town.

Table H.5: Land Use Projections 2000 - 2030

PROJECTED RESIDENTIAL LAND USE	2000	2010	2020	2030
Low Projection	303	310	318	326
Change in Number of Households	--	7	8	8
1 Acre Minimum Lot Size	--	7	8	8
Density of 1 Unit Per 40 Acres	--	280	320	320
High Projection	303	314	326	341
Change in Number of Households	--	11	12	15
1 Acre Minimum Lot Size	--	11	12	15
Density of 1 Unit Per 40 Acres	--	440	480	600

REDEVELOPMENT OPPORTUNITIES

No redevelopment opportunities were identified by the Plan Commission at this time.

EXISTENCE OF BROWNFIELDS OR PROPERTIES SUITABLE FOR REDEVELOPMENT

The Wisconsin Department of Natural Resources maintains a database referred to as BRRTS (Bureau for Remediation and Redevelopment Tracking System). The database lists contaminated lands and sites and includes the following: spills, leaks, Superfund sites, and other contaminated sites that have been reported to us or otherwise discovered. The database currently contains thirty-five records for Mineral Point (these are not necessarily sites in the Town: the list does not distinguish between types of jurisdiction with the same name) and includes the following four categories:

LUST: A Leaking Underground Storage Tank that has contaminated soil and/or groundwater with petroleum. Some LUST cleanups are reviewed by DNR and some are reviewed by the Dept. of Commerce.

ERP: Environmental Repair Program sites are sites other than LUSTs that have contaminated soil and/or groundwater. Often, these are old historic releases to the environment.

SPILLS: A discharge of a hazardous substance that may adversely impact, or threaten to adversely impact public health, welfare or the environment. Spills are usually cleaned up quickly.

No Action Required: There was or may have been a discharge to the environment and, based on the known information, DNR has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge. Reports of UST closures with no action required are filed in state archives.

The complete database is available from the Department of Natural Resources Website. www.dnr.state.wi.us Activities on these sites including remediation is available for review on the website or by contacting the Wisconsin Department of Natural Resources. The following listings contain the DNR Activity Number, Activity Type, Activity Name, Municipality, County, and a Priority Level. As stated above, additional information is available from the Wisconsin Department of Natural Resources.

EXISTING AND POTENTIAL LAND USE CONFLICTS

There are a variety of land uses that can potentially cause land use conflicts. There are two common acronyms used to describe land use conflicts – NIMBY’s (Not In My Back Yard) and LULU’s (Locally Unwanted Land Uses). One of the most common occurrences, especially in a rural setting, is the presence of agricultural operations near non-farm populations.

Agriculture can affect adjoining small rural lots, which are used essentially for residential purposes. Similarly, the presence of small rural lots creates an adverse influence on the continued operation of agriculture enterprise. The issue of rural-urban conflict can arise when there is no separation between incompatible uses. Land use conflicts may arise in such situations through noise, odor, farm chemicals, light, visual amenity, dogs, stock damage and weed infestation, lack of understanding, and lack of communication to name a few. However, as the box on the right suggests, conflicts can arise from more than agriculture/residential situations.

- | Potential Land Use Conflicts |
|--|
| • Landfills or Waste Facilities |
| • Jails or Prisons |
| • Halfway Houses or Group Homes |
| • Airports, Highways, Rail Lines |
| • Low Income Housing |
| • Strip Malls and Shopping Centers |
| • “Cell” Towers, Electrical Transmission Lines |
| • Large Livestock Operations |
| • Industrial or Manufacturing Operations |

Scattered, random residential and commercial development has become a land use conflict within the Town. The “40 Acre Minimum” rule is creating problems, as non-farming landowners create a situation of having a house on “40 acres of weeds”. This type of development scatters houses across the landscape (rural sprawl), while at the same time carving up agricultural land into smaller and smaller non-contiguous pieces.

Restrictions on building location are also at issue in Mineral Point. Building on prime soils is restricted, which creates problems for land parcels that are nothing but prime soils – there is no place to build. Another conflict arises from an imbalance between the numbers of animal units allowed on a particular size of parcel. Permitted animal units must be tied to minimum acreage requirements. In other words, 50 cows cannot be on 10 acres.

INTEGRATED LAND USE

Certainly education and communication at all levels is fundamental to land use conflict resolution. Finding a way to separate incompatible land uses while recognizing the benefits that can be achieved through land use integration is key. Integration may be achieved through physical separation or a simple vegetative buffer designed to screen one land use from another. Such practical strategies require landowners with potentially conflicting land uses to acknowledge their impacts and then design their operations or development to account for this impact. A community approach utilizing physical solutions, planning strategies, and a long-term vision for the land will enable multiple and differing land uses to exist.

FUTURE LAND USE

Small town atmosphere, being near family and friends, and natural beauty were the top reasons why people choose to live in the Town of Mineral Point. It stands to reason that people in Mineral Point want to keep and improve their farms, maintain their homes and property, protect their investments, and improve their standard of living. However, agriculture promises to continue to change the future of farming; existing homes and

buildings will need remodeling, repairs, or improvements; new buildings and homes will be constructed. In order to achieve its vision, Mineral Point needs to continue to protect its agricultural base, while at the same time allow for limited residential development, including cluster development, while protecting the natural beauty of the Town that attracts people to it in the first place.
