

LAND USE ELEMENT

EXECUTIVE SUMMARY

The purpose of this section is to review and analyze land use in the Town of Wyoming. The land use element is the compilation of all other elements of this plan. Designating land uses and standards for development requires the Town to be able to adequately provide utilities, maintain roads, and support other services. Therefore, the policies and programs of the land use element must be supported by all other elements of the plan. This section will consider both current and future land use in the Town of Wyoming. At the present time, the dominant developed land use in the Town is forestry.

Wisconsin State Statute 66.1001(2)(h)

(h) Land-use element.

A compilation of objectives, policies, goals, maps and programs to guide the future development and redevelopment of public and private property. The element shall contain a listing of the amount, type, intensity and net density of existing uses of land in the local governmental unit, such as agricultural, residential, commercial, industrial and other public and private uses. The element shall analyze trends in the supply, demand and price of land, opportunities for redevelopment and existing and potential land-use conflicts. The element shall contain projections, based on the background information specified in par. (a), for 20 years, in 5-year increments, of future residential, agricultural, commercial and industrial land uses including the assumptions of net densities or other spatial assumptions upon which the projections are based. The element shall also include a series of maps that shows current land uses and future land uses that indicate productive agricultural soils, natural limitations for building site development, floodplains, wetlands and other environmentally sensitive lands, the boundaries of areas to which services of public utilities and community facilities, as those terms are used in par. (d), will be provided in the future, consistent with the timetable described in par. (d), and the general location of future land uses by net density or other classifications.

LAND USE POLICIES

The following are the land use policies for the Town of Wyoming.

Environmental Protection Land Use Policies

- a) **Recognize the fact that lowlands, floodplains and wetlands are sensitive environmental features and are extremely important in preserving groundwater quality.**
- b) **Wetland and floodplain areas shall not be altered unless such alteration would result in an enhancement of the natural resources being disturbed. Recognize that these environmentally sensitive areas have soils with a limited capability of supporting development.**
- c) **Recognize that steep and/or wooded slopes are extremely sensitive environmental features that are vital in maintaining wildlife in the Town. Development including roadways, driveways, and buildings on steep slopes should be avoided to minimize soil erosion; disruption of important wildlife habitat and to keep maintenance costs for foundations, roads, utilities, and waster disposal systems to a minimum.**
- d) **Recognize that while flat valley bottoms are often the most desirable areas for new development, these areas frequently contain highly productive and irreplaceable agricultural soils. Therefore, care must be taken to ensure that development occurs on the least productive valley soils.**
- e) **Recognize that sensitive environmental features such as lowlands, floodplains, wetlands, and steep slopes are extremely important in helping to define the distinctive character and scenic beauty of the Town.**
- f) **Construction practices that will protect surface water quality from siltation and pollution shall be required. This includes minimizing soil erosion both during and after construction.**
- g) **The Township will require all proposed public recreational development to conform to all of the policies and performance standards in this Land Use Element, particularly those aimed at protecting the agricultural character and farm vitality of the community.**
- h) **The Township intends to cooperate with and promote measures of erosion control recommended by the Iowa County Soil and Water Conservation District.**

Environmental Protection Land Use Standards and Criteria

1. No development or other destructive activities will be allowed in the wetland, floodplain, and steep sloped areas of the Town.
2. Lots created in the Town should be configured to respect the natural landforms and woodlands so that the natural system is respected.
3. Construction of driveways and houses in the Town should be designed to minimize the removal of trees and other natural vegetation.
4. Fit development and roads to the natural features of the site to preserve features such as topography, vegetative cover, and the natural drainage system.
5. All new development, including single family residences, shall be required to strictly adhere to stormwater control and erosion control practices as prescribed by Soil Conservation Service reviews and publications.
6. For all new development in the Town, surface water run-off should be minimized and detained on-site if possible or practicable. If it is not possible to detain water on site, down stream improvements to the channel may be required of the developer to prevent flooding caused by the project. The natural state of watercourses, swales, floodways or right-of-way shall be maintained as nearly as possible. The design period is the 50-year storm.

Town Character Policies

- **Recognize the critical role farmland, open space, historical architecture, scenic vistas, land- and riverscapes, natural resources and designated features, scenic roads, the Wisconsin River, and archeological, and cultural features play in defining and enhancing the Town's distinctive rural character.**

See Section A, Issues and Opportunities Element for the Town of Wyoming's Vision Statement.

- **Require new development to be harmonious with the surrounding natural landscape, particularly when building along or in view of scenic roads. This includes building set backs, natural or traditional colors and materials, and location of parking, signage, and landscaping.**
- **The Wisconsin River is a major natural and cultural resource that helps define Wyoming's distinctive character. Scenic vistas of the Wisconsin River should be preserved through scenic easements and building practices that do not diminish the quality of the vistas.**

All new development along or within the viewshed of scenic roads should be designed to blend in with natural appearances with regard to building design and appearance, driveway construction, grading, etc.

- **Preserve natural roadside vegetation within the Town.**

Because roadside trees are extremely important to the character of the Town, removal of trees must be minimized. For more information on natural areas of the Town, see Section E, Agricultural, Natural, and Cultural Resources Element.

- **Utilize the provisions of the Town's sign ordinance to help preserve the visual quality of the Town.**

The Town shall prohibit billboards and to the greatest extent possible, directional signage shall be designed to fit the natural character of the Town as it relates to materials, colors, and lighting. Secondary signage not providing direction or advertising a primary business shall be restricted.

Residential Development Policies

- **In areas not lying within sanitary districts, the minimum lot size for a new AR-1 single-family home site in the Town is 15 acres.**
- **All new driveways and access easements will require review and approval by the Town. Driveways must be constructed prior to commencing construction.**
- **All new residential development, including driveways, will be required to conform to the natural limitations presented by the topography, soils, and vegetation of the land being developed.**
- **The Town will not accept the dedication or maintenance responsibility for any additional roads servicing residential development.**

See Section I, Implementation Element for the Town's rural residential siting criteria and Map H-1 in this Section for more information.

Residential Development Standards and Criteria

1. New lots should be created by dividing land along natural boundaries such as hills and woods.
2. When dividing a parcel of land, road access to the remaining parcel shall not be cut off.
3. When building roads and driveways, excessive cut and fill to meet grade standards is prohibited.
4. To preserve the visual quality and rural character of the Town, any new subdivisions on unwooded or highly exposed parcels of land should be approved on the condition that
 - a. Deed restrictions on each lot in the subdivision require the planting of deciduous and/or evergreen trees on each lot.
 - b. A landscape zone should be planned into the development so that the visual quality of the Town is preserved.
5. Lots should be laid out, to the greatest extent feasible, to achieve the following objectives:
 - a. On the most suitable soils for private on-site waste treatment systems installation.
 - b. On the least fertile soils for agricultural uses and in a manner which maximizes the useable area remaining for such agricultural use.
 - c. In locations least likely to block or interrupt scenic vistas, as seen from the public roadway(s).
 - d. To minimize conflict with agricultural activities.
6. Livestock other than domestic pets shall be kept on lots at least 5 acres in size to avoid conflicts with residential areas. The number of animal units shall be governed by Section 3.4 of the Iowa County Zoning Ordinance.
7. Overall residential density: one house per 40 acres.
8. Residential development must have plans submitted to the Plan Commission for review and approval prior to construction or sale of individual lots. Plans must meet criteria established in all Town and County land use ordinances and made available to prospective developers. (Criteria might include: road widths, grades, locations, turn radii, driveway locations, cut-and-fill slope limits, maximum slopes, etc.)
9. Minimum parcel size for AR-1: 15 acres.
10. Minimum platted parcel size for a residential subdivision of more than one (1) single-family home site shall be 5 acres. Maximum density: 1 unit per acre. (E.g. 5 units could be built on a parcel. Units could be clustered.) The density standard does not apply to areas lying within sanitary districts.
11. Additional roads to service residential development: at expense of developer. Roads to Town standards but to remain private.
12. Proposed mobile homes: Permitted only in mobile home parks as defined in Wisconsin statutes. Park plans must be submitted to the Plan Commission for review and approval prior to construction.
13. Buildings for recreation other than use as permanent dwellings may be reviewed and approved on a conditional basis. Single buildings shall meet criteria established in all Town and County land use ordinances. (Recreation development must have plans submitted for review and approval same as Item 8 above.)
14. Cluster platted or "Planned Complex Developments" minimizing adverse impacts on land, views, traffic, woods, and scenic sites shall be encouraged. Overall density in the Town shall be as in Item 7 above. (E.g. Available house permits cannot exceed total Town acreage divided by 40. Variances may be granted to developments meeting criteria in adverse impacts.)
15. The minimum parcel site for development will be 15 acres in conformance with all of the other policies set forth in the Comprehensive Plan. All building parcels will be required to meet the provisions of the Town's Land Division Ordinance.

Agriculture Policies

- **Understand that farm economics are cyclical and that prime agricultural soils and major infrastructure (e.g. farm buildings) investments should be preserved not only as a primary land use in the Town, but also for agricultural use in the future.**
- **Encourage and protect agricultural operations as a primary land use in the Town.**
- **Recognize that cyclical and short term economic operations as related to agriculture are a threat to long term farmland preservation.**
- **Allow opportunities for and encourage specialized forms of agriculture such as orcharding, truck farming, etc., as a way of preserving farmland.**

For more information on agricultural land in the Town of Wyoming, see Section E, Agricultural, Natural, and Cultural Resources Element and Map E.2.

Agricultural Standards and Criteria

1. Development will not be permitted on productive farmlands having a history of farming activity (including cropland and pastureland) and/or lands containing prime farmland soils defined as Class I, II, and III or as designated by the U.S. Soil Conservation Service. Farmland areas should be preserved in blocks as large as possible to ensure the economical use of the resource.
2. Development abutting active farm operations shall be fenced and contain set backs with the intent of reducing residential nuisance complaints that could limit agricultural practices.
3. Whenever possible, development in farmland areas should be limited to housing for owners/operators and their immediate family members.
4. Proposed developments shall be restricted to not less than 500 feet from any operating agricultural activity.
5. Farm-related housing shall occur on the least fertile soils for agricultural uses and in a manner which maximizes agricultural use of the remaining useable area.
6. New private driveways or roads shall not be permitted to cross or bisect productive farmlands unless aligned along existing lines, fences, or appropriate natural features such as a stream.
7. Utility extensions (electric power lines, telephone lines, gas distribution lines) may not cross-productive farmlands in a manner than will disrupt farming activities.
8. Certain large scale confinement or intensive farming operations, as set forth in the definitions section shall be considered commercial.
9. Erosion control practices shall be encouraged in accordance with recommendations of the U.S. Soil Conservation Service.

Commercial Development Policies

- **All commercial development shall be subject to review by the Town Plan Commission.**

Commercial development shall be subject to site plan and architectural review standards incorporated in the county zoning ordinance.

- **Developers must submit written impact statements assessing their development's impact on farms, farmland, natural resources, scenic qualities, Town roads, taxes, and opportunities for employment.**

See Section A, Issues and Opportunities Element for the Town's Vision Statement.

- **Strip commercial development along state and county highways shall be prohibited. New commercial development should be clustered, rather than "spot zones".**

Cross easements allowing frontage road access between businesses will be encouraged to that clustering of commercial development can be facilitated.

- **Highway commercial or tourist related commercial development should only be allowed in areas where they will not conflict with other land uses.**

For more information on economic development policies regarding tourism in the Town of Wyoming, see Section F, Economic Development Element.

- **Low impact cottage industry and home based businesses will be permitted on a case-by-case basis consistent with the character of the Town.**

See Section I, Implementation Element for the Town's commercial siting criteria.

EXISTING LAND USE

The Town of Wyoming is a predominantly forestry based community. See Maps E.2 and E.8 in Section E, Agricultural, Natural, and Cultural Resource Element, for existing Wyoming land use maps.

Table H.1 is a breakdown by percentage for land uses in Wyoming. As indicated by the Iowa County Tax Assessors Office, the Town is 54.6 percent Production Forest and DNR-MFL Forest land.

Table H.1 – Town Of Wyoming Land Use

Classification	Town of Wyoming Percent of Land Area
Agricultural	28.1%
Residential (Single- and Multi-Family)	1.1%
Commercial	1.7%
Manufacturing	0.0%
Production Forest	34.0%
DNR-MFL Forest	20.6%
Undeveloped (formerly Swamp/Waste)	8.4%
Other (Federal, State, County, School, Cemetery)	6.2%

(Source: Iowa County Tax Assessor Dept., SWWRPC)

Agricultural

Agriculture occupies 28.1 percent of the Town's land area. Agricultural land includes land that produces a crop (including Christmas trees or ginseng), agricultural forest (forested lands contiguous with agricultural land), supports livestock, or is eligible for enrollment in specific federal agricultural programs.

Residential

As indicated by Map H.1 and Table H.1, residential land use accounts for 1.1 percent of the land area within the Town.

Commercial

Commercial refers to any parcel that has a business on it, but does not include industrial properties. This may be a convenience store, car wash, bank, grocery store, tavern, etc., referring to any type of retail or business establishment. The existing land use map does not differentiate between highway businesses, home occupations, or general businesses, but classifies all of the above as commercial. In the Town of Wyoming, commercial development occupies approximately 1.7 percent of the total land area.

Manufacturing

Manufacturing refers to business and industry that is engaged in processing, manufacturing, packaging, treatment, or fabrication of materials and products. As indicated by Table H.1, there is no manufacturing in Wyoming.

Forested

This classification is Production Forests and DNR-MFL Forests acreages combined. In Wyoming it is the largest classified land use. Map H.1 and Table H.1 show that approximately 54.6 percent of the land area in Wyoming is forest under these classifications.

Undeveloped

This classification refers to areas that were formerly classified as swamp/waste. It is open land includes bogs marshes, lowlands brush land, and uncultivated land zoned as shoreland and shown to be wetland. Approximately 8.4 percent of the total land in the Town of Wyoming is classified as undeveloped land.

Other

Remaining land types that do not fall into the above categories, including federal, state, and county lands, school property, and cemeteries, are classified as "other". Approximately 6.2 percent of land in the Town of Wyoming is listed under this classification. Refer to Maps E.2 and E.8, Section E, Agricultural, Natural, and Cultural Resource Element, and Table H.1 for more information.

LAND USE TRENDS**Table H.2: Town of Wyoming Land Use Assessment Statistics Iowa County – 1993**

Real Estate Class	# of Parcels	Land Value
Residential	301	\$837,000
Commercial	46	\$768,700
Manufacturing	N/A	N/A
Agricultural	620	\$5,103,300
Swamp & Waste	N/A	N/A
Forest	622	\$5,074,200

(Source: Wisconsin Department of Revenue-1993)

Table H.3: Town of Wyoming Land Use Assessment Statistics Iowa County – 2003

Real Estate Class	# of Parcels	Land Value
Residential	351	\$5,900,900
Commercial	34	\$1,058,100
Manufacturing	N/A	N/A
Agricultural	457	1,010,400
Swamp & Waste	N/A	N/A
Forest	575	\$17,154,700

(Source: Wisconsin Department of Revenue-2003)

LAND USE TRENDS - RESIDENTIAL

Residential land use occupies 1.1 percent of the Town of Wyoming. Table H.4 indicates changes in single-family residential units between 1990 and 2000 for the Town of Wyoming compared to Iowa County.

Table H.4: Town Of Wyoming Single Family Housing Unit Change

	1-Unit (1990)	1-Unit (2000)	% Change
Town of Wyoming	163	174	6.7%
Iowa County	6,632	7,796	17.6%

(Source: 1990 & 2000 US Census)

As indicated by Table H.4, the single housing units in Wyoming increased 6.7 percent between 1990 and 2000, while single housing units in Iowa County increased 17.6 percent.

IDENTIFICATION OF SMART GROWTH AREAS

The Town of Wyoming Comprehensive Plan identifies smart growth areas in Section H of the plan, areas defined by this process as places that make sense for future development. Map H.1 indicates the smart growth areas for future residential development in the Town.

LAND USE PROJECTIONS

Table H.5 shows future residential land use projections for the Town of Wyoming, derived from Section A, Issues and Opportunities of the Comprehensive Plan.

Table H.5: Land Use Projections 2000 - 2030

Projected Residential Land Use	2000	2010	2020	2030
Low Projection	145	148	148	149
Change in Number of Households	--	3	0	1
1 Dwelling Units Per 15 Acres	--	45	0	15
High Projection	145	159	170	181
Change in Number of Households	--	14	11	11
1 Dwelling Units Per 15 Acres	--	210	165	165

REDEVELOPMENT OPPORTUNITIES

No redevelopment opportunities were identified by the Plan Commission.

EXISTENCE OF BROWNFIELDS OR PROPERTIES SUITABLE FOR REDEVELOPMENT

The Wisconsin Department of Natural Resources maintains a database referred to as BRRTS (Bureau for Remediation and Redevelopment Tracking System). The database lists contaminated lands and sites and includes the following: spills, leaks, Superfund sites, and other contaminated sites that have been reported to us or otherwise discovered. Thirteen sites have been documented in the Town of Wyoming. The list includes the following four categories:

LUST: A Leaking Underground Storage Tank that has contaminated soil and/or groundwater with petroleum. Some LUST cleanups are reviewed by DNR and some are reviewed by the Dept. of Commerce.

ERP: Environmental Repair Program sites are sites other than LUSTs that have contaminated soil and/or groundwater. Often, these are old historic releases to the environment.

SPILLS: A discharge of a hazardous substances that may adversely impact, or threaten to adversely impact public health, welfare or the environment. Spills are usually cleaned up quickly.

No Action Required: There was or may have been a discharge to the environment and, based on the known information, DNR has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge. Reports of UST closures with no action required are filed in state archives.

The complete database is available from the Department of Natural Resources Website. www.dnr.state.wi.us Activities on these sites including remediation is available for review on the website or by contacting the Wisconsin Department of Natural Resources. The following listings contain the DNR Activity Number, Activity Type, Activity Name, Municipality, County, and a Priority Level. As stated above, additional information is available from the Wisconsin Department of Natural Resources.

EXISTING AND POTENTIAL LAND USE CONFLICTS

There are a variety of land uses that can potentially cause land use conflicts. There are two common acronyms used to describe land use conflicts – NIMBY's (Not In My Back Yard) and LULU's (Locally Unwanted Land Uses). One of the most common occurrences, especially in a rural setting, is the presence of agricultural operations near non-farm populations.

The presence of agriculture and non-rural land use in close proximity often generates conflict due to potential incompatibility. Agriculture can affect adjoining small rural lots, which are used essentially for residential purposes. Similarly, the presence of small rural lots creates an adverse influence on the continued operation of agriculture enterprise. The issue of rural-urban conflict can arise when there is no separation between incompatible uses. Land use conflicts may arise in such situations through noise, odor, farm chemicals, light, visual amenity, dogs, stock damage and weed infestation, lack of understanding, and lack of communication to name just a few.

Potential Land Use Conflicts

- Landfills or Waste Facilities
- Jails or Prisons
- Halfway Houses or Group Homes
- Airports, Highways, Rail Lines
- Low Income Housing
- Strip Malls and Shopping Centers
- "Cell" Towers, Electrical Transmission Lines
- Large Livestock Operations
- Industrial or Manufacturing Operations

The Town identified highway businesses on State Highway 23, manufacturing/industry, and subdivision housing as current undesirable land uses in Wyoming. Noise and odors from agricultural and residential uses and noise problems from dogs and gunfire at the Rush Creek Sportsmen's Club are existing land use conflicts. The Plan Commission anticipates that in the future, the Rush Creek Sportsmen's Club will continue to be a source of noise conflicts.

INTEGRATED LAND USE

Certainly education and communication at all levels is fundamental to land use conflict resolution. Finding a way to separate incompatible land uses while recognizing the benefits that can be achieved through land use integration is key. Integration may be achieved through physical separation or a simple vegetative buffer designed to screen one land use from another. Such practical strategies require landowners with potentially conflicting land uses to acknowledge their impacts and then design their operations or development to account for this impact. A community approach utilizing physical solutions, planning strategies, and a long-term vision for the land will enable multiple and differing land uses to exist.

FUTURE LAND USE

Natural beauty, agriculture, recreational opportunities, and small town atmosphere were the top reasons why people choose to live in the Town of Wyoming. It stands to reason that people in Wyoming want to keep and improve their farms, maintain their homes and property, protect their investments, and improve their standard of living. However, existing homes and buildings will need remodeling, repairs, or improvements; new

buildings and homes will be constructed. In order to achieve its vision, Wyoming needs to preserve its rural character while exploring and expanding its recreational and cultural opportunities, protecting the Town's unique natural beauty that appeals to so many.
